LocalDrop LAN

HIGH-SPEED LOCAL FILE SHARING

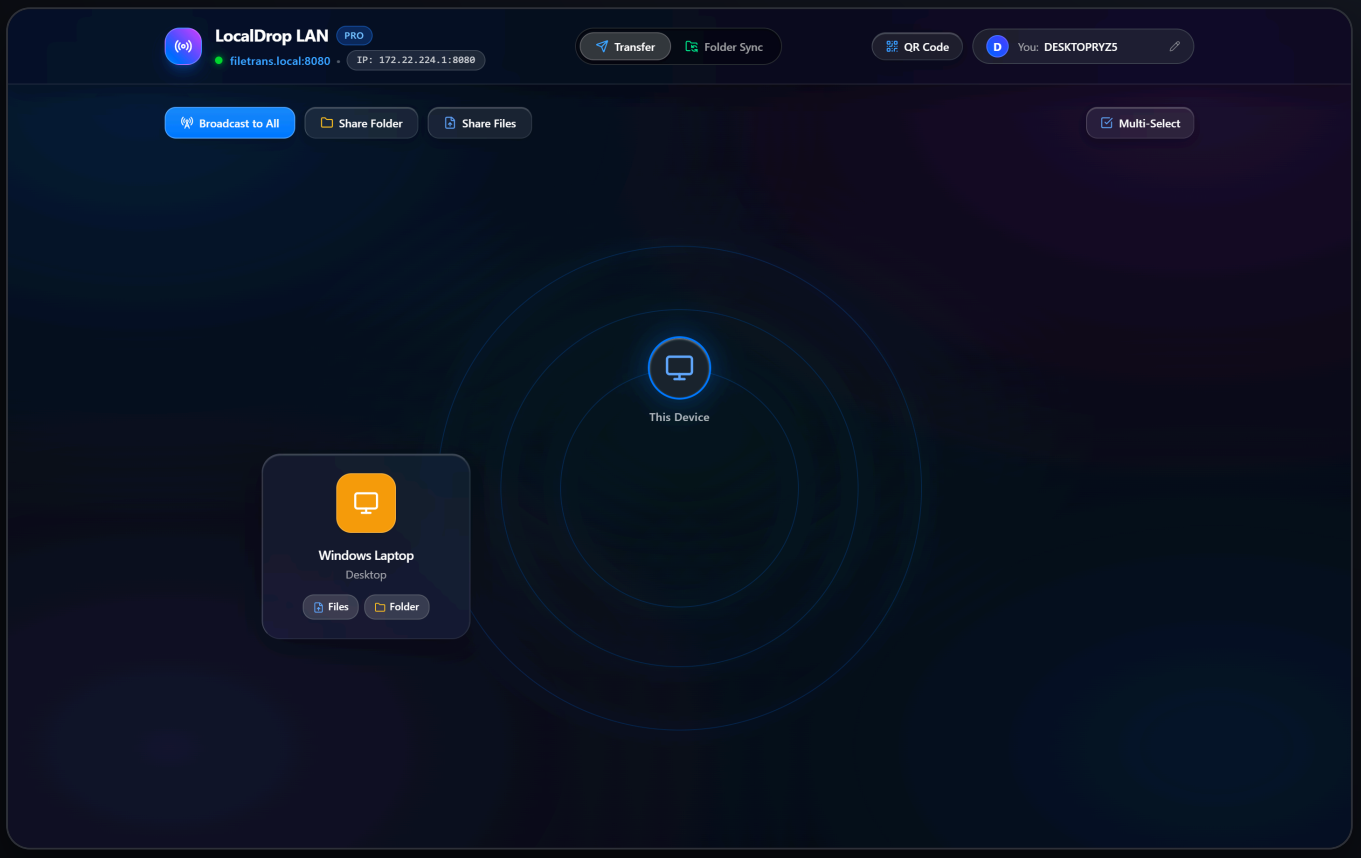

Open Source • 100% Private

NO CLOUD. NO LIMITS. PURE SPEED.

Lightning-Fast Transfers. Zero Internet Required.

Transfer files and folders directly across your local Wi-Fi and Ethernet. Enjoy blistering 500 Mbps speeds, instant radar device discovery, and seamless cross-PC folder sync.

Up to 500 Mbps | 15GB+ Large Files | QR Code Mobile Connect | 100% Private LAN

500 Mbps Transfer Speed

Direct device-to-device streaming over your local network. Transfer gigabytes in seconds without internet bandwidth usage.

No File Size Limits

Seamlessly handles 15GB+ files, 4K videos, ISOs, and entire folders with direct stream-to-disk reliability.

Instant Radar Discovery

Zero configuration. Automatically discovers PCs, laptops, and smartphones on the same Wi-Fi instantly.

100% Private & Cloud-Free

Your data never touches external servers or third-party clouds. Pure local-area network privacy.

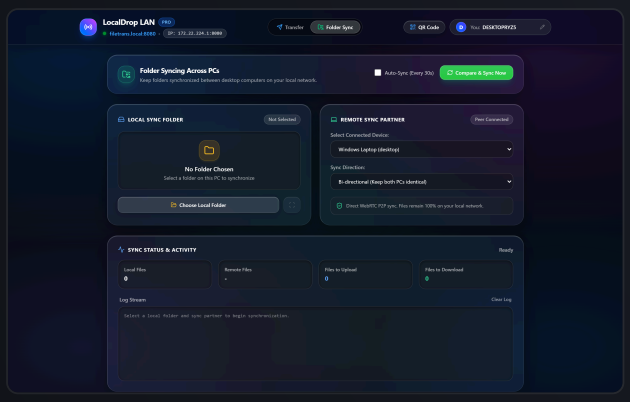

LocalDrop LAN

FOLDER SYNC & MOBILE PAIRING

Cross-Platform Ready

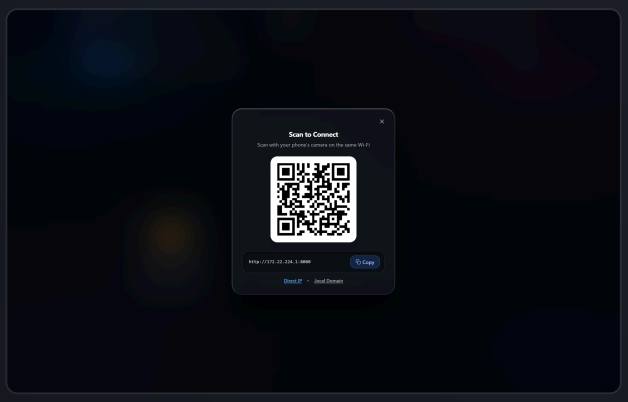

Designed for Everyday Productivity

Whether transferring large project files between workstations or receiving photos from a smartphone, LocalDrop LAN makes it seamless.

Cross-PC Folder Synchronization

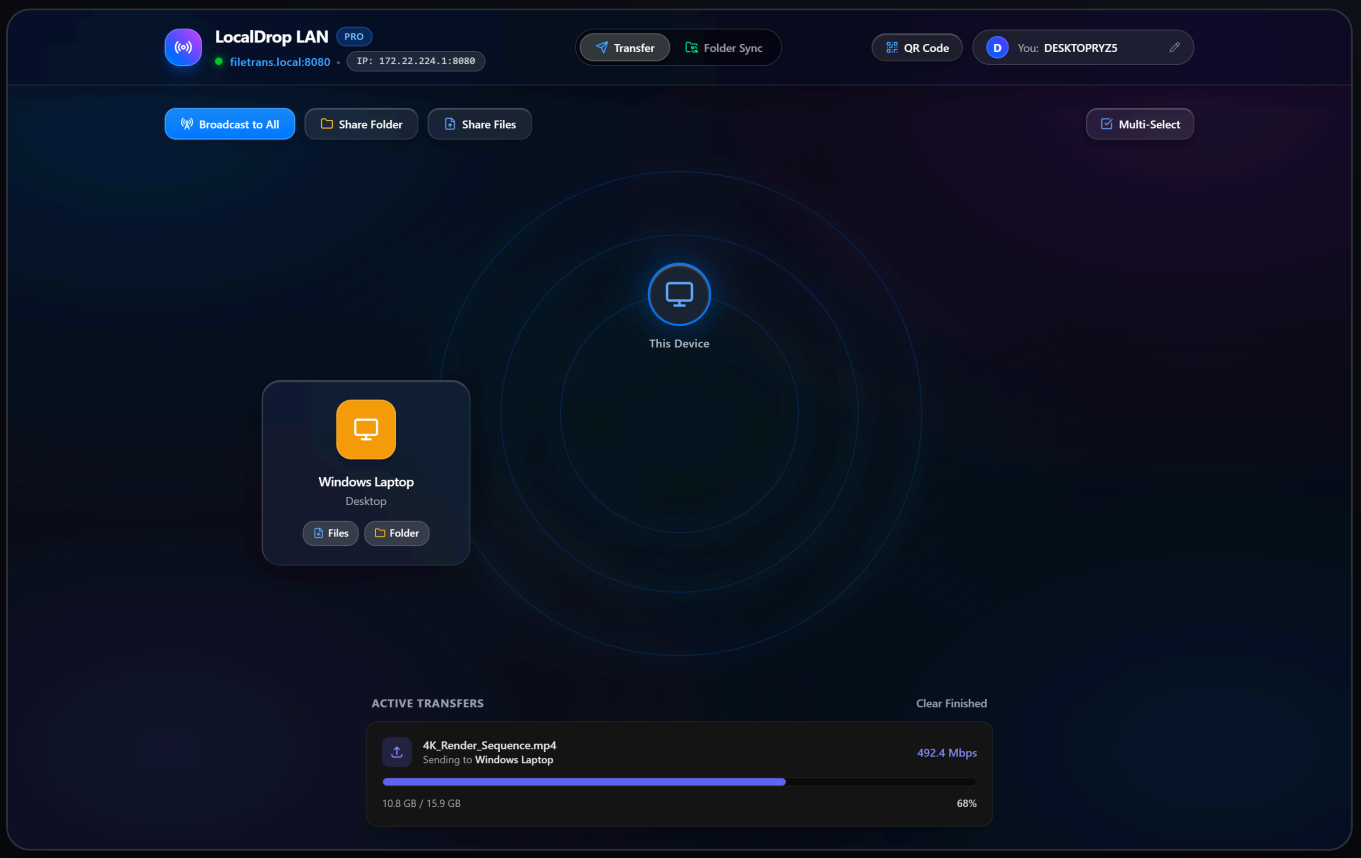

Keep project directories and folders in sync across desktop computers with automated differential comparison and bi-directional mirroring.

Instant Mobile Pairing

Scan the on-screen QR code with any iPhone, iPad, or Android camera to instantly connect and transfer files without installing any apps.
